Project Title	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform IT procurement using ServiceNow Flow Designer, boosting efficiency and speed. It tackles manual task creation inefficiencies, promising better operations, reduced processing delays, and higher employee satisfaction. Key features include automated task creation and direct assignment to the Hardware group upon approval.

Project Overview	
Objective	The primary objective is to revolutionize the standard laptop procurement process by implementing automated workflows in ServiceNow Flow Designer, ensuring faster and error-free task assignments.
Scope	The project comprehensively assesses and enhances the hardware procurement process, incorporating ServiceNow Flow Designer automation for a more robust and efficient system.
Problem Statement	
Description	Addressing manual task creation and routing delays in the current standard laptop procurement system, which adversely affects operational efficiency and user satisfaction.
Impact	Solving these issues will result in reduced approval-to-delivery lead times, zero manual routing errors, and an overall enhancement in IT service desk operations.
Proposed Solution	
Approach	Employing ServiceNow **Flow Designer** to automate catalog task creation (sc_task) upon Service Catalog request (RITM) approval, setting the description to *"Laptop need to Configured"* and routing it automatically to the **Hardware** assignment group.
Key Features	Implementation of an automated workflow triggered by Service Catalog approvals. Real-time task creation and direct routing to the Hardware group

	without manual intervention. Standardized short descriptions and automated state updates across procurement stages

	- Real-time decision-making for quicker loan approvals. - Continuous learning to adapt to evolving financial landscapes.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Standard Workstation CPU	Intel i5 / i7 Multi-Core Processor
Memory	System RAM	8 GB / 16 GB RAM
Storage	Disk Space for Instance Access	256 GB SSD
Software		
Platform / Cloud Service	Enterprise Cloud Instance	ServiceNow Personal Developer Instance (PDI)
Workflow Engine	Flow Designer Engine	ServiceNow Flow Designer Engine
Modules / Tables	ServiceNow Procurement Modules	Service Catalog (sc_cat_item), Requested Item (sc_req_item), Catalog Task (sc_task)
Data		
Catalog & User Data	Platform Records & Schemas	Standard Laptop Catalog Item, Sample Approval Records, Hardware Group Users
Development Environment		
IDE / Platform Workspaces	Web Development Environment	ServiceNow Admin Portal & Flow Designer Studio Workspace
