Code-Layout, Readability and Reusability

Date	05 October 2026
Team ID	SWTID-2026-5240
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Proper alignment maintained in Flow scripts and condition builders.
2	Proper File Structure	Files and folders are logically organized	Yes	Flow, Catalog Items, and Catalog Tasks are structured under Service Catalog modules.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Clear naming used (e.g., Standard Laptop Task, Hardware assignment group).
4	Function / Method Names	Functions are descriptively named	Yes	Flow trigger set to Service Catalog and action explicitly set to Create Catalog Task.
5	Code Comments	Inline and block comments explain log c	Yes	Step descriptions added inside Flow Designer to explain task routing logic.
6	Modular Design	Code is split into reusable functions/modules	Yes	Flow triggers and Catalog Task creation actions are decoupled for reusability.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Legacy workflow engines removed under Maintain Items -> Process Engine.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Flow execution checks for approval state before task generation.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Standard Laptop Task Flow	ServiceNow Flow Designer	Standard Laptop Service Catalog Item	High

2	Create Catalog Task Action	ServiceNow Workflow Engine	IT Procurement & Hardware Fulfillment Workflows	High
3	Hardware Assignment Routing	ServiceNow IT Service Management	Hardware Configuration Requests	Medium
4	Service Catalog Trigger	ServiceNow Process Automation	Any Catalog Request-driven workflow	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5 / 5	Well-organized ServiceNow application structure with proper process engine linkage.
Readability	5 / 5	Clear activity labels and descriptions used in Flow Designer steps.
Reusability	4.5 / 5	Flow can be easily cloned and adapted for other IT hardware procurement items.
Documentation / Comments	5 / 5	Clear step-by-step guidance provided for catalog mapping and approval states.
Overall Score	5 / 5	Meets all code quality, structure, and procurement automation standards.
