Project Details

Field	Details
Date	05 October 2026
Team ID	SWTID-2026-5240
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (ServiceNow Flow XML / Update Set)	**Yes**
2	README / Setup Guide (Instructions to import and activate Flow)	**Yes**
3	requirements.txt / package.json / dependency file	**NA**
4	Database schema / seed files (Catalog Item Configuration)	**Yes**
5	Environment configuration file (.env.example or System Properties)	**NA**
6	Deployed application URL (ServiceNow Developer Instance URL)	**Yes**
7	APK / Executable binary (if applicable for mobile/desktop apps)	**NA**

S.No	Item to Submit	Submitted (Yes / No / NA)
8	Dockerfile / Containerization config (if applicable)	**NA**
9	Test files and test results (Service Catalog Execution Test Cases)	**Yes**
10	Demo video or walkthrough (Execution video link)	**Yes**

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
/servicenow-flow-project
├── /flow-definition
│   └── Standard_Laptop_Task_Flow.xml        # Exported Flow Designer XML / Update Set[cite: 1]
├── /catalog-configuration
│   └── Standard_Laptop_Catalog_Item.json    # Service Catalog Item configuration details[cite: 1]
├── /docs
  ├── Flow_Designer_Setup_Guide.pdf        # Step-by-step setup & installation guide[cite: 1]
│   └── Test_Execution_Report.pdf          # Catalog task automation test results[cite: 1] └── README.md                              # Setup and import instructions for ServiceNow Instance[cite: 1]
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://devXXXXX.service-now.com[cite: 1]
Login Credentials (Demo)	**Username:** admin

Field	Details
	Password: [Your Instance Password]
Platform / Hosting Provider	ServiceNow Personal Developer Instance (PDI)[cite: 1]
Repository Link	https://github.com/your-username/servicenow-it-procurement-flow
Demo Video Link	https://drive.google.com/your-demo-video-link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

- ServiceNow Personal Developer Instance (PDI) with Admin access

- Web Browser (Chrome / Firefox / Edge)

- Standard Laptop Catalog Item configured under Service Catalog

Step 1: Log in to the ServiceNow Personal Developer Instance using Admin credentials.

Step 2: Navigate to 'Flow Designer' under Process Automation.

Step 3: Import the 'Standard_Laptop_Task_Flow.xml' file or create the flow named "Standard Laptop Task".

Step 4: Verify the Trigger is set to "Service Catalog" and actions are configured to create a Catalog Task with Assignment Group as "Hardware".

Step 5: Click 'Save' and then 'Activate' the flow.

Step 6: Navigate to 'Maintain Items', select "Standard Laptop", and set the Process Engine flow to "Standard Laptop Task".

Step 7: Go to Service Catalog > Hardware > Standard Laptop, click 'Order Now', approve the request, and check the generated Catalog Task under the Requested Item.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Catalog Task generation requires manual approval of the Request before triggering in non-automated testing setups.	**Workaround:** Admin manually updates the Approval field to "Approved" under Approvers tab for test verification.
2	Assignment to "Hardware" group fails if the "Hardware" group is missing in the ServiceNow instance.	**Workaround**: Ensure the standard "Hardware" user group is active in the instance before activating the flow.
3	Flow Designer logs may take a few seconds to update task status in real-time.	**Status: Refresh the Requested Item (RITM) form page after submitting the order to view the newly assigned task.**
